Since COVID-19, the children of the Rainbow of Love Orphanage, except Abimelech, are studying online. Adjustment is quite tricky due to the internet quota's difficulty and the availability of devices for children to learn online. With HOPE *worldwide* Australia support, we can buy two tablets and a wifi router for the children to attend lessons.

The good news is that all four school children are graduating. Two children pass and move up to Grade 7 and have been accepted, and the registration fee has been paid too.

Thank you again for all the support, so that the children can still get the best education for their future. God bless.

ROBERT FINDS HOPE AND LOVE

June 3, 2020, is a historic day for the Pelangi Kasih Orphanage and Robert, a boy aged one year 11 months.

Rico and Ria, a couple who leads the church in Bekasi, West Java, officially adopted Robert,

Rico and Ria have been married for 11 years and yearn to have a baby. God is a God who answers prayers and gives the desires of the heart of someone He loves. Now this family has been perfected in love, parent, and child.

Congratulations, Robert; we wish you happy and healthy growth with your new family.

Amid adversities

Computer Training Center students struggle with their learning due to COVID-19. Almost all of the students use cellphones; this does not reduce their enthusiasm for completing learning materials.

After the lockdown in May, offline learning began by following the government protocols; students used masks, washed their hands before and after activities, keep the distance. The classroom capacity was adapted to the number of students. The evening class study online/virtual, but those who do not have a device allowed to come and learn from the Center according to the provided schedule.

Currently, the students come to the Center to learn to do their assignments every day. There are 555 student participants for Computer Training up to October 2020.

FINDING HOPE AND CHANGES LIVES

Before I studied at HOPE Computer Training Center, I didn't understand the computer at all. I felt that learning computer seems complicated; besides, I didn't have a computer or laptop. I started wanting to explore computer skills because I often applied for a job and frequently asked if I have computer skills or not?

I am grateful to have the opportunity to learn about computer skills at the HOPE Computer Training Center. I got a lot of knowledge, starting with ten-finger typing skills, Microsoft office to a basic introduction to the internet. I also learned to be more disciplined in time and study intentionally.

In November 2019, I completed the material & graduated, immediately applied for work, and was grateful that I was accepted. With the computer skills that I got, I was able to get a job that makes me able to support my family financially while I was working. Currently, Fitri is the backbone of the family, supporting her mother and sister.
